

HORIX

TRUST DISMANTLING PROGRAM

Your aircraft is no longer worth what you thought and the **engine overhaul costs** are higher than the value of the aircraft itself, doesn't matter if an airplane or a helicopter. It's a situation you find yourself after years of flying and rising **maintenance costs**, and now you're uncertain about the future of your aging aircraft.

Another case is when you put your aircraft up for **sale** to switch to a more modern one. You contact a broker who helps you estimate the value and you decide to put it on sale at the **average market price**. Again, the market value is below your expectations.

When an aircraft passes the 15 years of life its market value is less than the sum of its components. This is the reason why we increasingly see the dismantling of very young airliners.

The same thing happens with bizjets and helicopters. However, it is not in the interests of brokers to propose such a procedure, also because it is not their job.

The ultimate solution is the Horix Trust Dismantling Program.

EXPERTISE

We carry out an expertise with your CAMO in order to estimate the value of the components and to compare it with the current aircraft sales price.

1

BASIC

Dismantling of high value components only.

Airplanes
Engines & APUs

Helicopters
Engines

Helicopters
Transmissions &
blades

SOLUTIONS

Based on the result of our expertise we are able to offer you the best solutions which are usually the following:

2

STANDARD

Dismantling only high value components and selling the rest to another entity in bulk, we can often buy all the remaining parts ourselves.

3

PREMIUM

Dismantling all the existing parts, normally everything that has a P/N, is the most expensive work in terms of manpower and cost for the paperwork but in the long term the most profitable.

Based on the solution you choose we take care of the dismantling process of your aircraft, each part gets certified by an EASA Part 145 MRO, traced by our ERP system and placed on the market at a Fair Market Value.

Spare parts are stored and managed according to the Horix Aerospace **AS9120B** quality management system.

Your components are managed in accordance with the **Trust Consignment Program** signed with us.

The Trust Consignment Program **guarantees** you the full availability of your components and that they are properly stored and preserved.

The ultimate solution is the
HORIX
TRUST DISMANTLING
PROGRAM.

Easy, Trusted Process

Horix Aerospace has become a disruptive force in the aerospace industry in both its trust dismantling program and business model.

With over
\$30M
Assets under
management

Horix Aerospace focused in spare parts management **solutions** for the business aircraft market. Strong capitalized and managed by a team of industry veterans.

HORIX
AEROSPACE

Horix Aerospace is proud to be a Swiss owned and operated company.
